PRATHMESH PIMPALSHENDE

B.Tech (Computer Science) | Linux, Cloud & Full-Stack Development

Karve Nagar, Pune | +91 7758835860 | prathmpimpalshende@gmail.com | GitHub | LinkedIn

CAREER OBJECTIVE

Computer Science undergraduate combining Linux administration, Bash scripting, and full-stack (MERN) development with hands-on AWS experience (EC2, S3, Lambda, RDS, VPC). Seeking a DevOps, Cloud, or System Administration role in a growth-focused team.

EXPERIENCE

Web Development Intern — Digital Guruji (Remote) | Apr 2025 – Jul 2025

- Built responsive web interfaces using HTML, CSS, JavaScript, and Bootstrap.
- Assisted in debugging and implementing full-stack features across multiple client projects.

PROJECTS

CloudDataFlow — Event-Driven AWS Data Pipeline — *AWS (S3, Lambda, RDS, EC2, ALB, VPC), Node.js, Python* • GitHub

- Built an event-driven pipeline: S3 uploads trigger a Lambda that writes data to RDS MySQL and S3.
- Designed a multi-AZ VPC with public/private subnets, NAT Gateway, ALB, and EC2 Auto Scaling.
- Secured with IAM roles (no hard-coded keys), private RDS, security groups, and presigned S3 URLs.

Linux Administration Toolkit — *Bash, RHEL* • GitHub

- Built a menu-driven Bash toolkit for RHEL covering system monitoring, user/group management, disk monitoring, automated backups, and log analysis.
- Automated user and group administration using useradd, userdel, groupadd, usermod, id, and getent.
- Built disk-usage monitoring with automatic threshold warnings, timestamped compressed (tar.gz) backups with logging, and a log analyzer using grep, awk, cut, and sed.

Unreel — AI-Powered Fact-Checker for Viral Videos — *React, Node.js, Express, MongoDB, Groq AI, Tavily* • GitHub · unreeled.in

- Built an AI pipeline that detects bias and verifies claims in Reels/Shorts using Groq Whisper (STT), LLaMA 3.1, Tavily search, and OCR, with a 0–100 bias score.
- Added JWT + Google OAuth, a Telegram bot for on-chat reports, and a MongoDB dashboard with leaderboard.
- Used AI-assisted tools (Antigravity with Claude, VS Code Copilot) to speed up work while owning architecture and debugging.

Open Media Flow — *HTML, CSS, JavaScript, REST APIs* • Internship project · GitHub

- Built the frontend (HTML, CSS, JavaScript), integrated backend AI APIs, and researched media-generation APIs.

CERTIFICATIONS

- Full Stack Web Development & DSA in Java — Apna College (2025–Present)
- Participated in a university-level AI/ML Hackathon — Deepfake Detection project

SKILL HIGHLIGHTS

Technical Skills

- **Linux & SysAdmin:** Bash, User/Group Management, File Permissions, Disk Monitoring
- **Cloud (AWS):** AWS — EC2, S3, Lambda, RDS, VPC, ALB, Auto Scaling, IAM, Security Groups
- **Full-Stack:** React, Node.js, Express.js, MongoDB, REST APIs, JWT/OAuth
- **Languages & Tools:** Python, Java, JavaScript, Git, GitHub

Soft Skills

- Teamwork
- Time Management
- Adaptability
- Self-Motivation
- Active Listening

Analytical Skills

- Critical Thinking
- Problem Solving
- Research & Analysis
- Attention to Detail
- Troubleshooting

EDUCATION

Qualification	Institution	Year	Score
B.Tech, Computer Science	GH Raisoni University, Nagpur	2026	7.91 / 10
